Over Sopra Banking

'We create the future of banking'

If you want to predict the future, create it! With Sopra Banking.

Become a multi-faceted IT consultant, specialized in finance as well as in IT. A position for a (starting) career in ICT & Finance

Sopra Banking is a global leader in software and IT services for financial institutions. They help over 500 customers in 70 countries be more efficient, agile and responsive to business challenges. It is an international leader in banking solutions, IT services and software development. In the Netherlands the company works with clients in the Financial Services market and is a growing company that offers great opportunities to skilled employees seeking challenges in commitment-driven team environments. The Netherlands as a strategic market within the company! In order to support the growth, several vacancies' are open for young professionals with a strong IT background. If you have an international ambition, they have great possibilities as well. For example, we have strong growth in Africa and Asia. If you want, we can get you there. When you start you will get to know our own platform and our products. You be trained half a year before you start working on projects. If you want to develop towards an architect or senior, we'll train you to get there for the coming years. With really complex projects you get the flavour of doing business with IT!

Responsibilities

After a first 3 weeks initial training and multiple trainings concerning the banking sector, the IT minded (geek) professional will:

- Work on the configuring, development, programming, implementation, maintenance of the core banking software products, depending on your profile and background.
- Perform functional and technical analysis within a team at the office or at the client site;
- Learn about the banking and finance industry through the coaching of senior colleagues and challenging projects of the world of today and even more; they create the world of tomorrow. As we develop banks and their financial systems with their Banking of the future platform and products.

With the idea of “Thinking ahead begins now!” concept plays an important role: your well-being at work, your career evolution and your continuous training are key ingredients of a successful collaboration.

To expect

- Part of an international culture (35.000 people), a French company of origin. Headquarters in Paris
- The Dutch hub is a small (50 people) and well developed team, within a huge European company
- Regular travel to Brussels, as strategy and R&D is located here
- Flexibility in working approach and daily schedule. No day is the same
- Customers are located in the Randstad, like Rabobank, ABN and MoneYou, van Lanschot, NIBC and more
- A dynamic, constant changing and new environment

- Creativity and drive to create the world of tomorrow, innovative thinkers
- Able to work flexible 'nieuwe werken', and be flexible
- The consultant will report directly to the Team Leader in the Netherlands.
